

Maine Pediatric Dental Providers

Updated November 2022

It can be challenging to find a dental office that is accepting new patients. As a From the First Tooth program, we encourage parents to schedule a new patient appointment 6 months before a child turns one year old in anticipation of a lengthy wait time. If a child is experiencing a dental emergency, most dental offices have an emergency dental waitlist and will try to see a patient as soon as possible.

Description of Dental Provider
<p>Pediatric Dentist Pediatric dental offices use a traditional dental office model of offering preventive and restorative dental treatment. Pediatric dental offices are specially trained in delivering dental care to children.</p>
<p>Oral Health Clinic Oral health clinics tend to offer a traditional dental office model of offering preventive and restorative dental treatment. Most oral health clinics try to lower barriers to accessibility by offering a sliding fee scale, which allows for increased affordability. To qualify for the sliding fee scale, new patients are required to complete new patient paperwork to determine eligibility.</p>
<p>Independent Practice Dental Hygienist (IPDH) Independent Practice Dental Hygienists offer preventive treatment and have an established relationship with a dentist in case a referral is needed.</p>
<p>General Dentist General Dentist offices use a traditional dental office model of offering preventive and restorative dental treatment.</p>
